There are four items of general interest that we want to take up here in Section I: A) Hemisphere and Quadrant Emphasis, B) Elements and Modes, C) The Ascendant and Midheaven, and D) The Conjunctions. These four categories give us an intelligent overview of how you structure personal experience and what you aim for in life. This general patterning gives us a context to understand the specific personal meaning of the material in Sections 2 through 11.

A. Hemisphere and Quadrant Emphasis

The different areas of life are laid out in the horoscope by spatial territories called houses. These areas of life show interests and general involvements for each person. These areas can be grouped together for a vast overview of most basic inclinations of the person. The most useful general groupings of houses is into hemispheres and quadrants. Emphasis in a hemisphere or quadrant shows a particularly strong focus toward life from that perspective.

1. *Hemisphere*

The horoscope can be split into 2 equal parts, either horizontally (giving us the upper and lower hemispheres) or vertically (giving us the right and left hemispheres). The Upper Hemisphere shows the outer, more extroverted side of the personality, the Lower Hemisphere shows the more introverted and hidden side of the personality. In the Left Hemisphere planets are rising and this shows action. In the Right Hemisphere planets are setting and this shows reaction.

Most Planets Above the Horizon

You have the majority of your planets above the horizon showing that you have a need for contact with the outer world in order to feel fulfilled each day. You enjoy projects, achieving and a sense of accomplishment. Success for its own sake is more important than what security it might present to you.

Most Planets Rising

You have the majority of your planets on the eastern half (or left-hand side) of your chart showing that you take great pains to be sure that you are free to act as you wish in life. Freedom of movement and expression are important to you. You have a strong feeling that you make your own destiny.

2. *Quadrant*

The two ways of splitting the horoscope into hemispheres can be applied simultaneously giving us four quadrants. The FIRST is called the quadrant of personality. The SECOND is called the quadrant of the environment. The THIRD is called the quadrant of relationship. The FOURTH is called the quadrant of service.

Most Planets in the Fourth Quadrant

You have the majority of planets in the fourth quadrant showing that you have a fascination with the big picture. You are interested in accomplishing something in the larger world. You wish to serve the community somehow. Career and projects that have an effect on more than your own life become the focus of your activity. You often attract recognition. This may or may not be important to you.

B. Elements and Modes

The Elements and Modes show what we aim for in life. They show our broadest focus and in the most general sense, how we go about achieving our goals.

1. Elements

The four elements (fire, earth, air and water) are the most comprehensive inventory of the personality that we have. Everything in the universe including the human personality can be examined in terms of the four elements. FIRE is your basic enthusiastic urge, EARTH shows your concern for the material world, AIR is the element of abstract thought, WATER is your empathy impulse. Fire and earth are primitive and focus on the self. Air and water are derivative and focused on others. Fire and air are naturally extrovert, optimistic, active, and freedom oriented. Earth and water are basically introvert, pessimistic, passive, and security oriented.

Fire

You have 20% of your chart in the fire element showing that you have an awareness of how much energy you lack that others seem to have. Still, you have plenty of enthusiasm and stamina prevalent. You go toward each project with a certain amount of pre-selectivity. You are always prompted to do more, primarily because you don't trust that you are doing enough. In the long run, this single characteristic guaranties you accomplish much in life.

Earth

You have 30% of your chart in the earth element. This shows you know how to be practical. It is important that you stay balanced in your approach to the material world. You are prone to obsess on details and practical considerations and then periodically ignore them. You do much better to develop a mode of operation for being in the world and then to adhere to this way of being, regardless of your particular feelings in the moment.

Air

You have just 20% of your chart in the air element. You have a magic blend in the air element. You have an ever-active intellect. Your eye is always looking, your mind is always attempting to grasp more and more information. You don't feel confident in what you know. This lack of confidence prompts you to keep on task with the learning process. You never relax on the subject of gathering new information. In the long run, you become quite scholarly in life, out-performing most others in the mental realm.

Water

You have 30% of your chart in the water element. The emotional content of your chart is so strong that it is never a neutral ingredient in your life. How you are able to integrate this quality of empathy into the rest of your personality traits will determine how well you will mingle with others. Learning good relationship skills early in life is very important to your proper adjustment and socialization to life and your culture.

2. *Modes*

The three modes are CARDINAL, FIXED, and MUTABLE. The modes of expression show how you act out your urges in the world. They represent your most basic responding mechanism toward all of life experience. The cardinal planets show direct expression in physical action, leadership ability and strength. The fixed mode planets in your chart show reaction, consistency, persistency, endurance and stubbornness. The mutable planets in your chart show synthesis, blending, malleableness, thought, forethought, debate and wisdom. The following statements show the way the three modes manifest in your life.

Cardinal

You have 30% of your chart in the cardinal mode showing you have a dynamism within you that prefers to act according to your own perceptions rather than someone else's. You are action-oriented, but you easily follow others' lead if they are going in a direction that you like.

Fixed

A tremendous amount of your chart is in the fixed mode. You have endurance. Whether a course of action is good or bad you are more likely to stay with it than change. The principle of inertia is with you. When you rest, you have real difficulty getting going. When you are in motion, you have real difficulty stopping or even changing directions (even slightly). People find you a loyal friend and a tenacious enemy.

Mutable

You have 30% of your chart in the mutable mode. Adjustment to new circumstances is relatively easy for you. Part of your nature is very stimulated by change. You like to think about your experiences so as to accommodate any new information that occurs. This is not your only way of being but your favorite mode of operation can be reactive. Exposure to new ideas and methods can help you be calmer while still helping you maintain interest in life.

C. **The Ascendant and Midheaven (Signs and Aspects)**

The ascendant is symbolic of our relationship to our immediate environment. This is the point rising in the east when we are born. One manifestation of our immediate environment is our physical body. The physical environment includes our body, our surroundings and our emotional and mental states. Thus, the ascendant tells us how our inner core expresses itself, and how we take in information from others and the universe generally. The sign rising in your horoscope tells us the type of energy you are processing, the type of physical body that you have for doing the processing and the natural inclinations you have in the personal arena in life. The planets in aspect to your ascendant tell us the kind of energy and stamina you have as natural allies in life. The ascendant is opposite the seventh house cusp (the place where we meet others and the world). This axis (ascendant-descendant) is how we clarify ourselves through relationships. Planets in aspect to this axis indicate the types of people and the types of relationships we seek as well as how and why we seek them.

SCORPIO RISING

Let's face it, you're intense. You have boundless energy and employ it freely on any task at hand. You need to be discriminating so that your efforts come to something. You have difficulty changing course once you set sail, so make sure you are heading in the right direction before you set sail. Others never really know you and a certain "loner" quality is within you. This doesn't have to be lonely. You are always fighting battles within your own soul that keep you preoccupied with your inner qualities. You are secretive by inclination. You hold your thoughts as precious and useful to you alone. When you do wish to take someone into your inner life, words fail to describe your true inner feelings. Strange as it may seem, you place a high value on relationships. You go out of your way to bring them about and to maintain them. Still, at your heart space, your marriage partner looking into your eyes has the distinct feeling of

looking into “one way mirrors”. Your emotional inner sanctuary is so private, it is only rarely that you let even yourself in.

Venus Square the Ascendant

Art and beauty are important to you. These ingredients will be important to many people that you find as significant in your life. Still, it is easy for you to find yourself in an adversarial position with others as you will often disagree over matters of taste and style. Many lessons in life are learned as you are exposed to people with different tastes than your own. Your opportunities to grow are massive if you keep reaching for a higher synthesis.

Mars Conjunct the Ascendant and in the 12th House and unafflicted.

You have energy within you but difficulty accessing it. Because of this people around you are confused about how assertive you are and about how important some issues are to you. You have an attraction to the inner side of life and it puzzles others that you still manage to get things done in the outer world. Many times you get a great burst of energy that helps you complete a project at the last minute. Much of your energy difficulties occur as you attempt to manifest your ideals. This is because the requirements of the external world are often at odds with your ideals. Taking note of the circumstances of the moment can give you better judgement as to how to apply your energy harmoniously. Many of your higher ideals get implemented anyway, so it is important to learn to not over-exert yourself. You go through some learning in life over the correct application of your desires. Your energy is useful and your life is productive, but you seem “out of tune” with others at times. This just means you suffer some by being misunderstood.

Saturn Sextile the Ascendant

Reliability, integrity, and self-discipline are three of your positive virtues. Patience and determination help you make progress toward any chosen goal. Since you take responsibility for what you do, you find it necessary to work by yourself at times. You can only relate fully to others when you feel good about yourself, which in turn revolves around feeling productive. People can rely on you and they come to know this.

Uranus Sesquiquadrate the Ascendant

You express an unusually adept ability to respond to changes in your life and your environment in a unique and abrupt fashion. Unfortunately, you leave many less hearty and less adventuresome souls behind you. Many people will like you without being close to you or, for that matter, really understanding you. You are hard for people to keep up with because you switch directions and a course of action with no forewarning. Personal freedom is so important to you that you let nothing get in the way of your exercising it. When you feel comfortable enough that your own freedom is a forgone conclusion, the humanitarian and peace loving side of your personality emerge. You do much to elevate other people and help them reach their potential.

Pluto Square the Ascendant

Things don't always go as planned. Years of work can go down the drain in an emotional fit when the world doesn't live up to your expectations. You have great amounts of emotional energy and fortitude. You come into your own in life when this energy is controlled and directed in an intelligent manner. A certain vindictive streak does you harm and stops others from getting close to you until it is recognized and dealt with.

2. *The Midheaven*

The Midheaven is the high point in your chart. It indicates what you aspire for, what you see as your duty, and what authority and limits are about. Because of this basic meaning the Midheaven indicates how you live out your social station and what you do for your career. The point opposite the Midheaven is the fourth house cusp, referred to as the nadir, which is the indication of our roots, our heritage. This axis (Midheaven-Nadir) indicates the way we grow in life. The sign on the Midheaven shows our basic energy and approach toward dealing with the world. Planets in aspect to the Midheaven show qualities of our inner being that we wish to contribute to the world and that we wish to be fulfilled through our interaction with the outer world.

VIRGO MIDHEAVEN

You are careful about taking on new responsibilities. Once committed, you try to do your best. You make progress in life by paying attention to details and by focusing on the most important items in your daily experiences and completing them satisfactorily.

Sun Conjunct Midheaven and in the 10th House and unafflicted.

You demand a position of authority just by your being. Others have to recognize you and deal with you. Basically, people like you and are happy to see your success as you rise in life. You were born around noon and you seem to naturally bask in your own radiance. You carry a full view of the surface issues of life into every position, project or decision.

Moon Trine Midheaven

You are good with people. You know instinctively what will please others and what will be problematic. After you have become comfortable with yourself and your own ways, you are at home in the general public.

Mercury Semi-Sextile the Midheaven

A certain nervousness and sense of adventure can have you switching techniques or arenas of operation so often that tasks remain undone. Clarity of purpose and patience bring you long range success in life. You have a way with words and can move others when your mind is clearly fixed on a goal and method for its achievement.

Jupiter Opposite Midheaven in the 3rd House and unafflicted.

You have a confident outlook and positive expectations for your future. This is a great help in bringing about positive circumstances. You may miss key factors in projects going on around you but you are lucky and someone always seems to help you out.

Uranus Sextile Midheaven

Your humanitarian and futuristic instincts supply you with unique problem solving skills. Your natural drive in career will be toward the new, the innovative, and the progressive. You have a knack for discovering the way to get the most freedom in your job.

Neptune Semi-Square Midheaven

You have great difficulty manifesting your ideals. You have a creative spirit that you can't manifest until you bring your vision of the world into a more direct and coordinated alignment with the facts of your life. You are sensitive and psychic but this can easily be a burden until you learn to decipher the difference between your feelings and those of others.

D. The Conjunctions.

A Conjunction occurs when two planets are in the same immediate area of the Zodiac. The conjunctions in your chart show central linkings of basic energies in your life. When one area (represented by a planet) expresses itself, it brings along the other area (represented by the other planet). When you are studying the rest of this printout of your life, keep in mind that linking of these energies is a central theme in your life and these areas should be studied together.

Venus Conjunct Pluto

Think of Sections V. VENUS - Your love nature, and XI. PLUTO - Your need for fundamental change, as a single unit. This Conjunction represents a central theme in the formation of your values. An underlying intensity is present that conveys power on all that you get involved with.

The Sun is the center of the solar system. All life revolves around it within this sphere. In the same way, the ego is the center of personal identity and gives integration and continuity to individual experience. In this sense, it might be said that the Sun shows character. This is the fixed pillar at the center of the person around which all else circulates or revolves.

The sign placement of the Sun shows the center of the individual's basic character. The sign of the Sun is the most primary indicator of the forms of experience you are attracted to. Further, this most important placement shows how and why you are attracted to these experiences.

The house placement of the Sun sign shows the primary area of expression for the individual in life. There is a psychological, emotional, and physical significance to the house placement of the Sun. Aspects to the Sun show ways that the core of the personality are linked to other component elements in the individual's life. Aspects to the Sun have a deep and overriding significance in the life of the individual and are generally more important, more prominent than other aspects in the chart.

You want the world to be perfect. You expect perfection from yourself. You are good at analyzing and rendering conscientious and systematic service in an honest and impartial way. You are so critical and seemingly unemotional that others may dislike you or at least feel you are very boring. You do lack imagination and tend to be somewhat of a "grind", but when it really matters you are there and can be relied upon. You are an exacting and responsible craftsman. When you become truly tolerant and less self-critical, your vision of life expands. Then, you enjoy life rather than just exist and produce in it.

Sun in 10th house

You are achievement oriented. You have a natural expectation that positions of power, authority and responsibility should come to you. You receive help in your climb in life from people further up the hill. You will be well known in your immediate circle and that may transport out to a larger world picture.

Sun in 10th house Unafflicted

You are surefooted and advancement comes to you naturally. Others not only recognize you but generally like you. You are responsible and competent so your success is fairly secure in your chosen field.

You are like the proverbial cat that always lands on its feet.

You harvest experience and store it away. It becomes an asset. You have a natural instinct for seeing your own limits and the limits of a situation. You gauge your commitment, your involvement, and your energy well. Generally, you have enough of whatever you need to get the job done in life. This is perhaps the nicest and most productive influence to find in a horoscope.

Inner harmony and balance creates tremendous momentum. You have a tight weaving between your ego and emotions. You achieve much and always can compensate for things that don't work out as planned.

You are full of energy. When you get excited about a project you are very enthusiastic and quick to act on a plan. Your sense of right and wrong translate into action. You are brave, willing to "stand up for what you see as right".

Energetic, enthusiastic, (and at times) very combative, you have a way of getting to your goal. You enjoy the contest of others trying to stop you. Your creative energies flow very strong when you are opposed.

You are lucky, but suffer from the tendency to "overplay your hand". You feel lucky and justified in the good coming to you. Your optimism easily becomes opportunism. Your life improves when you insist on "earning your own way". Pride will sometimes block your vision. Conceit leads you to wrong choices. Try being more empirical and less superstitious. Learning comes naturally and when you translate this quality into learning about yourself, life gets better in many ways. Strive for integrity when you catch yourself being overly pompous.

You chase “the good life” and often get things that others only dream about. But to be really happy you have to concentrate on what you have, rather than on what you are missing. Love of life and generosity to people are “benchmarks” of your career. You are happiest when you feel genuinely grateful for what you have.

You are always looking for a better way of being. You have keen perception for the untried and can envision things that might be, even though they do not yet exist. You have a sense for the dramatic and can express a new idea as if it was commonplace and common sense. You are unique and will often play an inspirational role in others’ lives. You are prone to sudden romantic attachments as you recognize the uniqueness of others.

You have an original and unique outlook on life - seeing ways and means lost on less adventuresome souls. You can be a good team player because you view life from a creative and liberal standpoint; believing that new, unusual, and unique happenings can occur. This spontaneity gives your personality color, as well as leading you to conclusion that are significantly different than ordinary logic would have us anticipate. Your personality has a good deal of sparkle.

SECTION III. The MOON - Your Personal Life.

The Moon inscribes a circle around the earth. It moves more swiftly than other astronomical bodies and thus represents day to day and moment to moment movements, adjustments and preoccupations. The Moon is the symbol of the personal life which is molded and shaped by our environment, by events, and by social and familial expectations. Further, the Moon shows our responses to life which are based on our past habits, experiences, our heritage and our individual and collective cravings.

The sign placement of the Moon shows how you project yourself to the general public, how the instinctive and imaginative component of your mind operates, how you express your feelings and your most general experiences of your family and mother.

The house placement of the Moon shows how and where you make day to day adjustments. Further, it shows the things you are most interested in dealing with in order to gain emotional equilibrium.

The aspects of the Moon show the general characteristics of the personality that are emphasized. Planets in aspect to the Moon are symbolic of qualities in the personality that are used instinctively, habitually and with a high degree of versatility.

You have a sense of inner satisfaction that is both your strength and your weakness. On one hand, you know how to be persistent, to feel contented and to take the sensuous joy in the goodness of life. On the other hand, you may have real difficulty getting going when your circumstances require change. You may have some talent for the arts and you certainly love the creation of beauty. Your feelings run deep and your instincts and reactions to life are very colored by your past experiences.

Moon in 6th house

You have an unconscious need to find the origin of what isn’t working. You are capable of working in routine and menial jobs as part of your larger career picture or as part of a social process that allows you to transcend a sense of personal responsibility.

Moon in 6th house Unafflicted

By the time you reach adulthood you have figured out what works and what doesn’t work at the level of your daily routines and habits. You find satisfaction through helping others and have a natural instinct for knowing where and when to give assistance. Good practical training has built a powerful gridwork of social graces and charms into the floor of your unconscious.

Your Moon in aspect to your Sun is a central feature of you life. This aspect is the primary indicator of your basic energy. We talked about this aspect in the Section II. The Sun - Your Ego Structure.

Outbursts of anger and emotional extravagance get you into trouble. You are always finding your limits by exceeding them. Better to learn to think before acting. Planned intervals of strenuous physical activity can take the edge off of

contentious emotions and help you obtain some deeper balance. Don't eat when upset and your health will be better. Link your energy to some humanitarian, idealistic project and your perspective widens and your life improves.

You are competitive to the point of combat. It is necessary for you to have some outlet for your energy and recognize that your habits reinforce an emotional response of taking everything that happens to you as an aggressive challenge that you must rise to (or react to). You can be a tireless worker, capable of being productive even when under tremendous stress, but directing this energy productively rather than reactively is very difficult.

You are outwardly successful in life even though you have to go through some inner pain in your personal life. Your greatest virtue is that you do learn from your mistakes. You correct your own actions and go on. Your life may have several low points while you are reorganizing after a setback. You will be hard-pressed to sort out your true responsibilities and may find the day to day planning of your time to be quite challenging.

Doubt of self and fear of failure make life worrisome, but life is easier when you accept that you have periodic interruptions in your path to success as well as changes in direction every so often. These aren't comfortable but all part of the process.

You are a good idea person. You are highly emotional and intuitive. New thoughts and methods come to you in flashes. Make it a practice to write new ideas down as they occur. Your ability to explain your thoughts to others, once initially shaped in written form, can find further refinement through discussion if you are a careful listener. You are seldom satisfied unless you are making changes and the more innovative, the better.

You act on unique and experimental thoughts. You are humanitarian and freedom oriented in the way you explore life. You have a knack for improving your surroundings.

SECTION IV. MERCURY - Your Mental Life.

Mercury is the closest planet to the Sun. From the viewpoint of the earth it seems to dart back and forth across the face of the Sun, having three retrograde cycles a year. Mercury is the planet of your mental life. It shows how you receive, process and disseminate information. The sign placement of Mercury shows your basic attitude and mental habits. The aspects of Mercury show your scope of vision and your methods for accomplishing tasks.

Your mind is on a quest for perfection, harmony and beauty. You are rational and fond of comparison. You look for justice. You want the right answer, the right inflection and the right emphasis. When you speak, others will see you are incredibly polished and persuasive. Be careful you don't end up as some oily, back-bending huckster bent on selling through flattery. Have a position of your own and assert it up front, as diplomatically as possible. When circumstances aren't to your liking, you make premeditated adjustments for the effect. They can be superficial or even insincere. You are easily led astray because your mind is open to all points of view. Translate this into a higher intuition; then, your open, balanced fair-mindedness wins you respect from others and many good friends.

Mercury in 10th house

You are able to apply knowledge in a very practical way. You may be able to turn your skill with language into literary talent. Your mental versatility and general adaptableness may bring you several changes in employment.

Mercury in 10th house Afflicted

You need to guard against a tendency to take shortcuts. Try to be honest and plan a direction in life. You may have a time in life of wandering aimlessly. Love of success can get in the way of doing justice to the process.

You have a real interest in communicating your thoughts to others; you have a pleasing manner of expression. However, you will occasionally hurt your cause by telling people what you think they want to hear rather than what you really believe. Try to be consistent in thought and speech. You will experience more stress in the short run but greater peace of mind.

You get great ideas, even brilliant at times. Still, others don't always hear what you are saying and this makes you angry or standoffish. Whenever this happens, recognize that you need to be thorough and practical or else the world will not see what you have found so interesting. This is not the world's fault. Slow yourself down long enough to learn

how everyone else does things and you will find a natural channel for getting your ideas across. Remember, a good idea is only a good idea until it is put into practice. Get physical exercise and you might find your nervousness much easier to control.

You are an original thinker but you find yourself creating rebellion and moving to the left of even your own co-thinkers. Spontaneous internal combustion in your mental life keeps you moving toward freedom, without getting closure. Your nervous and iconoclastic attitude makes you difficult to get along with. Practice listening to others without devaluing them in your mind and you will overcome your natural mental self indulgence.

You are bright and insightful but the very strength and depth of your vision can mislead you. In consequence, you get in your own way a lot. The magnitude of a project can intimidate you so that you don't even embark on it. You are a perfectionist and compulsive. You fear being judged by others as inadequate and this quality has you afraid to act. Of course, you do overcome this many times in your day to day life, but it goes smoother for you when you stop attributing negative motives to those around you. You are able to do this when you feel better about yourself. Periods of meditation and contemplation are necessary to get to know yourself.

Focused intense energy is raging in your mind. You are able to create a new situation for yourself, but, you are required to take little breaks in order to perpetuate a positive line of thought.

SECTION V. VENUS - Your Love Nature.

The planet Venus shows the way you express your love nature and what you aspire for in life as good or beautiful. Venus has much to do with how you form your values. The sign placement of Venus shows the type of love energy you have. The house placement of Venus shows the natural area of expression of the love energy. The aspects of Venus indicate how and under what circumstances you express the gentle and loving side of your nature.

You are an openhearted lover. You are creative and demonstrative. You are a lover of pleasure and luxury and want people to think well of you. You have a flair for the dramatic. You inspire others to act because they sense the genuine wholehearted approach in you, which is lurking behind your continuous pose. You seek inner harmony through some dramatic or creative self-expression. When you warm up to someone, the relationship becomes an outlet for the artist in you. You are very generous and need to be more discriminating as to where to give and when. A noblesse oblige attitude and outlook colors the way you pour out love, affection, and material help onto others.

Venus in 9th house

You have a love of faraway places and people. Because travel is an important value for to you, it is likely that you will spend some time in a foreign country. You are devotional and very intuitive. You have the ability to inspire anyone that you feel close to. You help others bring out the best in themselves.

Venus in 9th house Unafflicted

You may prosper quite a bit through your long-range view of life. You have the big picture in mind and your basic optimism is inspiring. You create success, not just for yourself but also for others. You are a good listener, and can entertain many points of view as valid and valuable.

You are prone to emotional and financial excess. Your beliefs and values are at odds with your desires and it takes a lot of energy to integrate the two. You may become very interested in the baser, more physical side of romance. This is because you instinctively look for a common denominator between desires and values. The way out of this dilemma is to work at helping others and avoid putting energy into the selfish side of your drives.

Conflict between love and desire causes a deep inner struggle. You look for "love in all the wrong places." Dancing, singing, and music are a way that you can create more of a harmonious atmosphere around you. There is a self defeating and self destructive chord in your nature which needs some instruction in the right direction in order to be more beneficial. First, be conscious of your tendency to react to others; then, you automatically start lifting out of the baser side of your nature. When you catch yourself acting in a way that is not in your best interest, concentrate on your ability to defer immediate pleasure for a long range good.

Musical and artistic talent are part of your nature and personality. This same artistic eye and ear on life can give you a trusting and gentle disposition. You believe in people and are deeply hurt when they don't live up to your lofty expectations. You admire and are attracted to the dramatic in relationships because of their ability to promote a value. You want the world to be better than it is so you do what you can to reinforce that which you see as good.

A romantic lover, you have a naturally beautiful heart quality that moves you toward a higher ideal in yourself through relationships. The love in you creates harmony and your artistic skills and aesthetic appreciation emerge out of your heart of hearts. You have emotional textures and a gentleness that others usually only recognize when you create something of beauty, but, the subtle eye observes your refined sensitivity to the beautiful that reveals itself every time you speak or move. You have good taste and others recognize the balance and harmony of your selection.

You may not be particularly sentimental but if you love someone, you love them completely and forever. You live on the emotional extremes. People are either important to you or they don't even exist. Your feelings are deep and volcanic. You love power and control which is fine if you have learned to control yourself. You are magnetic and surrounded with an aura of mystery. You deal with groups and group resources. You may have leadership in some creative project or in some financial enterprise. You polarize people: they either love you or hate you but are seldom indifferent to you.

SECTION VI. MARS - Your Energy.

Mars is the planet of desires. It shows how you aim at your goals and how you power yourself toward your goals. Mars represents your most fundamental wants. The sign placement of Mars shows the fundamental nature of your assertions. The house placement of Mars shows the area of your life you are most likely to focus on. The aspects to Mars show how and to what extent your desires and assertions are involved with other aspects of living.

Your desire nature is strong, maybe even insatiable. You are passionate and your energy is unrelenting and disciplined into channels toward perceived goals. You go after what you desire in life with your whole being. You are thorough and when angry can be ruthless. You can be quite self-contained and you have an austere quality that means you can keep going even against great odds for a long period of time. You need to learn how to relax. Life is not always a battlefield.

Mars in 12th house

You desire an ideal. You are impulsive but have good psychic sense for being able to turn any situation to your advantage. Because your natural drive is toward the unmanifest, it is easy for you to "tune out" of your immediate surroundings and live inside your feelings, projections, and expectations.

Mars in 12th house Unafflicted

A steady stream of energy sustains you. You have inwardly bonded with something larger than your own life; this long-range habit pattern gives a touch of the ideal to everything you do.

You have an aspect of Mars to the Sun. This shows that you have a very strong and direct nature. Your energy and vitality are key ingredients to your self concept. This issue is taken up in some detail in the Section II. The Sun - Your Ego Structure.

Mars in aspect to the Moon shows that you have a lot of energy wrapped up in your instinctive consciousness. This insight is detailed out in Section III. The Moon - Your Personal Life.

You have Mars in aspect to Venus. This aspect shows sex appeal and interest in romance. This aspect is covered more fully in Section V. Venus - Your Love Nature.

You have good mechanical skill and interest in finding new and unique ways of accomplishing your goals. You are impatient with the way things are and strive for instantaneous change. Your inventiveness makes you a good troubleshooter as well as skills at streamlining a process. You love finding the quick path through a project and are

willing to take the initiative in life. Remember, less hearty souls don't travel as fast as you nor do they have your love of speed.

Dynamic activity and your spontaneous expression of energy is quite useful in getting your point across to others. There is a definite mental quality to the way your energy expresses itself. You are detached and analytical when finding your way to a goal.

You have lots of energy that erupts into violence every so often leaving you confused and exhausted. In industry, you have a taste for secrecy and covert operations. As a warrior you are more at home leading a guerrilla band in the jungle than as a general leading the parade down Fifth Avenue. You are at war with yourself. Your conscience is at odds with your desires and only long-range study and integration of your personal values can lay the foundation for smooth, comfortable, and regular energy. Until this happens, you suffer from having abundant energy that bursts forth violently, then little energy for a spell. The violence, anger, and disagreements with others stop as well as abnormal needs for secrecy (which just becomes more normal needs for periodic privacy) when you arrive at some degree of self-understanding.

You have great capacity to be violent, angry, pernicious, and willful. Your energy is greatly amplified and spills over into everything that you do. Your desire nature tends to run on its own if not directed by your reasoning. Discipline, reason, and correct judgement are difficult ingredients for you to use on this aspect of your nature, but, it is the path out of a deeply ingrained habit of reacting to circumstance. Work to change the focus of your energy any time your motive for acting is defensive.

SECTION VII. JUPITER - Your Values.

Jupiter is the king of the planets. He is in charge of the order of creation. Jupiter shows your values, where you feel confident and in control, and where you feel you have something to teach others. The sign placement of Jupiter shows your values in life. The house placement of Jupiter shows the area of life you feel luckiest in and the area you receive the most help from other people and from the cosmos. The aspect patterns to Jupiter show the direct network of good and administrative power in your life.

You are exceedingly idealistic, seeking meaning in a higher philosophic purpose. Yet, translating your beliefs into something practical requires self work. Everything (including your self picture) is amplified by your values. To become truly giving and compassionate, you must come to terms with who you are, which in turn puts the rest of the universe in proper perspective. Your motivation comes from your inner vision which is all inclusive and truly universal in scope. Progress requires clarity of your goals and beliefs as well as self definition. At your best your ideals express a very genial, benevolent, and peaceful attitude toward life. From this platform of values, you serve the world in a wholehearted manner. Although you are secretive and require privacy and rest, you do wish to serve humanity. Your service may be direct or may boil down to meditating on uplifting the human spirit or in just thinking nice thoughts about others. Your emotional and devotional nature finds positive outlet through charitable causes and social institutions that do something for public welfare. You are easygoing with an interest in cultural pursuits. The arts give you some higher vision of truth and beauty as well as help you be balanced and less susceptible to other people's demands. The work of clarifying your inner vision and self perception is very important because, if you feel bad about yourself or take yourself too seriously, you become secretive to the point of being abstruse and devious. This will lead you to ideals that are entirely self-serving and closed off from others. But, regardless of whether your values be good or bad, you are lucky, being spared the logical consequences of your action by some kind of outside intervention. This appears to be just jolly good luck to onlookers but it is really your power of attraction and deeply embedded faith in the goodness of life, working itself out through unconscious channels; for, more than most people, you have faith in life. Further, your lighthearted attitude and sense of humor buoys up your spirit. You only suffer if you lose track of this inner lightness or succumb to the tendency to take yourself too seriously. Keep a good balance between private and public life and your spirit stays in a productive and casual place.

Jupiter in 3rd house

Have confidence in your ability to learn and gather information. You showed great promise early in life. You are accurate and confident in the way you organize big projects. Sometimes you have difficulty being in the here and now because so much of your energy is invested in the future.

Jupiter in 3rd house Unafflicted

You get along with others because you have the ability to inspire them with your words. You give people faith in life by formulating your ideas and explanations from an optimistic perspective. You get along best when you have a great amount of motion in your daily life.

You have an aspect from Jupiter to the Sun showing a deep connection between your values and your ego. As a consequence of this you have a stronger faith in your beliefs than most people and you are more likely to act on them. You have the potential for being quite an inspiration for others. In Section I. (The Sun - Your Ego Structure) there is more commentary on this trait of yours.

You are a real humanitarian, wishing only the good and best for yourself and the world. You are a possibility thinker. You envision the good and ask “why not”?! You see a broad and very versatile picture of the way things are in life. Often this vision allows you to take advantage of critical timing of personal events. You are at the right place at the right time. To others you appear lucky. You are! Your personal successes are in tune with your basic humanitarian outlook.

Your underlying faith in life leads you to the right conclusion and the right spot, even when circumstances are difficult. Your luck descends at times when you act spontaneously and without forethought. Your pictures in life are painted with bold strokes indeed. You operate with great confidence and swiftness, believing that life is full of potential for you.

You feel lucky and that gets you into trouble. You get overextended and into financial hot water before you know what has happened. Being gullible and naive, you suffer through believing in your own fantasies. Because you are kind and sympathetic, you go out of your way to help others. But here you can suffer through poor judgement as to what will be of real and lasting help. The way out of this confusion is not to be less idealistic or less sympathetic, but instead to be more long-term in your vision. Ask yourself what will be important 10 years from now in your immediate considerations. Taking the long view of yourself and of life is an acid test for moment to moment decisions.

You often solve problems by expanding your base of operation.

Your picture of life and what it has to offer is very big. Periodically you take some chances by “throwing caution to the wind” and going for what you think you really want. You feel that the things you want are coming to you. You often experience uncanny success that surprises others. This happens most frequently when you haven’t ignored your foundations.

SECTION VIII. SATURN - Your Obligations.

The planet Saturn shows where you feel restricted. You feel obligations and fears through Saturn. Because of your feeling connected with Saturn you are either responsible or neglectful. The sign placement of Saturn shows the basic type of energy connected with your obligations. The house placement of Saturn shows an area of life that you feel restricted in and work hard to obtain the things that come to you. The aspects of Saturn show the most direct involvement of other areas of your life with your feelings of responsibility.

You fear the unknown. You create more and more detail, become more analytic, and increase your technical proficiency, all to push back the frontiers of the great expanse. You need to have more faith in life and avoid being wrapped up in endless dissecting. You want to adjust to life on its own terms. Remember, your perceptions of the world exist in your mind as potentials first. Give up worrying. You are very productive and enough is enough.

You have a slow climb to a position of power and responsibility. Your life generally works for you because you don't blame others for what you have become. You desire respect and get it because your self-reliance and perseverance brings you success.

Saturn in 10th house Afflicted

Although you work hard, enough is never enough. Your discontent and overextension brings your downfall. Don't let your reach exceed your grasp. Build firm foundations.

You have Saturn in aspect to the Moon showing a close relationship between your upbringing and your emotional outlook. This connection is explored in its essence in Section III. The Moon - Your Personal Life.

SECTION IX. URANUS - Your Search For Freedom.

The planet Uranus is beyond the orbit of Saturn and can't be seen without the aid of a telescope. It represents the sky in us, that which transcends the limits of finite life. Uranus raises the vibration of everything it contacts. The sign placement of Uranus shows your broadest striving for freedom. The house placement of Uranus indicates your area of direct unique expression. The aspects to Uranus indicate the way you express your need for higher consciousness.

You are sensitive and emotional. You blend instinct and intuitive understanding together. You may move on such a fast track mentally, that the reasoning, analytic function gets lost in the shuffle. A consequence of this is that you will find yourself doing things that you don't understand and have not clearly thought through. This unconscious action pattern can lead you to altering certain fundamental assumptions about your own emotional foundations in life. This reevaluation of your feelings can lead you to having a very unusual and creative personal life and family living situation.

Uranus in 8th house

You have a deep interest in the occult and hidden aspect of life. You have the ability to rebuild your life after things go wrong by going into the roots of your own drives and values. You may have a profound change of values at these moments. You have unexpected gains and losses as circumstances change rapidly.

Uranus in 8th house Unafflicted

You have a keen imagination and accurate intuitions. You are able to help others build a stronger and more consistent picture of self-worth through a genuine recognition of their uniqueness. You hold a powerful picture of how society and the world can be.

You have Uranus in aspect to the Sun showing that you are a freedom lover at heart and this forms a central feature of your personality. This aspect of your nature is explained in Section II. The Sun - Your Ego Structure.

You have Uranus in aspect to the Moon. This indicates that you have an emotional pattern that expresses your uniqueness. This is explained in Section III. The Moon - Your Personal Life.

You have Uranus in aspect to Mercury. Your Mental attitudes express your quest for freedom. This is explained in Section IV. Mercury -Your Mental Life.

You have Mars in aspect to Uranus which means you are attempting to raise the vibration of your desire nature during the course of this life. Exactly how that works out in the day to day world is shown by Section VI. Mars - Your Energy.

You have Uranus in aspect to Jupiter showing that you have a big vision of what life can be at its best. How this works out for you is discussed in Section VII. Jupiter - Your Values.

Your idealism is lopsided and tends to be at odds with the society you live in and the direction of your culture. This doesn't make your ideals wrong, just impractical. You are prone to nervous fits and disturbed periods where it is difficult to accomplish much and difficult to relax. Somehow you seem to express your society's dissatisfaction with itself. Your life betters through the study of meditation, biofeedback, yoga, and/or grounding or centering activities.

You seem to get caught between personal freedom and your higher social ideals. This conflict is pronounced at times and other times scarcely noticeable but, it is always present, subtly coloring all your decisions.

SECTION X. NEPTUNE - Your Spiritual Aspirations and Ideals.

The planet Neptune has an almost perfectly circular orbit. It represents the part of our nature that strives for perfection, that looks to some higher ideal. The planet Neptune rules the ocean and the part of us that is beyond the limits of the shores of personal existence. The culture moves with the cycles of Neptune and it is the primary indicator of your connection to the culture that you live in. The sign of Neptune shows an ideal that you desire to manifest. The house placement of Neptune shows the area of your life that you want to express this ideal in. The aspect patterns of Neptune indicate the most direct connections yet most subtle networking of your personality into the world at large.

You have a powerful desire to create harmony because you believe that by doing so you reduce the pressure on people and create the circumstances of justice, peace, and understanding. You see humanitarian ideals not just as correct, but aesthetically pleasing.

Neptune in 11th house

You are an idealist but may expect too much from friends. You like friends who are intuitive and artistic. You admire people who can add a new dimension to your own reasoning and have the ability to effect change in others.

Neptune in 11th house Unafflicted

You bring an attractive, higher outlook to your social life. On the other hand, because of this it is quite difficult to be "one of the boys" because you have a deep need to uphold a higher standard. Until you become truly comfortable with yourself you may feel quite lonely.

You have Neptune in aspect to Venus. This indicates that you are very artistic by inclination and idealistic in love. This pattern is described in Section V. Venus - Your Love Nature.

You have an aspect of Neptune to Jupiter. This indicates that you have a lofty vision of the possible in life and that you attract good things by this expectation. How this works out for you is shown by Section VII. Jupiter - Your Obligations.

You have Neptune in aspect to Uranus showing that one part of your nature will have a propensity to act out the unexpected. How this manifests is indicated in Section IX. Uranus - Your Search for Freedom.

You are fundamentally an idealist. You would like to see change come about in a way that doesn't destroy the existing social order. You believe in transition and transformation as saner and kinder principles of social change than revolutionary upheaval.

Your higher ideals are the continuous recipient of forceful energy for change. Your long range perspective (even though this may at times be unconscious) is always toward your ideals winning out through deep self transformation.

SECTION XI. PLUTO - Your Need For Fundamental Change.

The planet Pluto represents the dark underground part of you. It shows your ability to transform the most fundamental properties in your own inner nature. The sign of Pluto is the way the obsessive, compulsive and committed part of your nature expresses itself. The house placement of Pluto shows the area of life where you make your most fundamental and most potent changes. The aspects to Pluto show the deepest most unconscious links in your personality structure.

At best, you believe in yourself and are willing to stand on your own. You have a need for self expression. At worst, you are completely stuck on yourself, and have a strong desire to bend everyone else to your will.

Pluto in 9th house

You have a great desire to expand your horizons and your general knowledge. This can lead you to travel, study religion, philosophy and ethics, and do some deep soul-searching. There is an adventuresome quality to your nature that is almost never at rest.

Pluto in 9th house Unafflicted

When you talk, others listen. You often only reveal your inner thoughts when you are in close, private company. Then, you "draw a bead" on the most important issue and express yourself in terse but captivating phrases. You have qualities that can inspire in any teaching situation.

You have an aspect of Pluto to Mercury. This indicates that you

have a profound mental life. This is detailed out in Section IV.

Mercury - Your Mental Life.

You have an aspect of Pluto to Venus showing that you have a very deeply entrenched love nature that you are transforming. The details of this are discussed in Section V. Venus - Your Love Nature.

You have an aspect of Pluto to Mars. This indicates that you have a very powerful desire nature that is being refocused. This aspect of your life is discussed in Section VI. Mars - Your Energy.

You have an aspect of Pluto to Neptune which shows your involvement in a large cultural process. This involvement is described in Section X. Neptune - Your Spiritual Aspirations and Ideals.

A. *YOUR UNIQUENESS*

Part of your style of being a person is tied to your personal method of adapting to and interacting with other people. This aspect of your personality shows itself through every aspect of how you deal with the environment. This method of your being encourages as well as reveals your uniqueness.

You are comprehensive in your outlook. Your inclination is to seek help and to change directions when you run into problems. Not that you lack fortitude, it is just that you are able to see an easier way to bring about changes than fighting. You have the ability to create opportunity by altering the focus of a situation to become favorable to you and your projects. You are the master of blending ingredients together and coming up with new opportunities. Your keyword is Synthesis.

B. *YOUR EASIEST AREAS.*

The following material is an index of things that you have developed as inner resources. You may take them for granted, but in times of reevaluation and rest this part of your personality can provide you comfort and strength.

Moon in Taurus.

You have an inner strength that is rooted in uncommonly deep self-acceptance and self-satisfaction. You have very consistent habits that help you.

Mars in Scorpio.

You have great stamina and a powerful presence. You win in life by being able to keep creating more energy from somewhere deep inside. When you are committed you have the energy. The way that you get things to happen in your life is by being persistent. Application of your energy over a long period of time always brings you some of what you want.

Jupiter in Pisces.

Your inner confidence and faith in life propel you forward. The personal good that you look for is always in tune with your perception of a social good.

Saturn in the Tenth House.

You have a gradual climb in career. You see progress from your efforts and learn from your mistakes. Being cautious is time and again turned to your advantage.

Uranus in the Eighth House.

You have a habit of facing a dead-end situation and altering it for your benefit. You have times of forcing deep changes in your personal value system and can affect those around you quite favorably through your changes.

C. *YOUR MOST PERSISTENT DIFFICULTIES.*

This material describes the “cutting edge” of your work on yourself. The thoughts rendered here are meant as further guidelines for growth. You should take difficulties and challenges in the right spirit. They are always positive indicators as to how you can experience the joy of becoming a better person and more like your REAL SELF.

Afflicted Mercury

You suffer because you draw the wrong conclusions from your perceptions. There are several ways of breaking out of a negative picture. You can ask other people’s advice as to your present course of action in life, you can strive to be

more empirical in your observations, and you can look for a consistent pattern in your past actions. Through expanding your perceptions, you can break out of a self-limiting mental bubble.

Afflicted Saturn

Fear and self-restriction have stopped you many times from enjoying life as much as you could. Work on breaking the habit of worrying by learning to see it and feel it as starts to manifest and using your sense of detachment to stop it. When you act unkindly to others or you are reacting to their unkindness to you, get to the roots of your fears. Force yourself out of your fears and refuse to let them be your motivation. You will see a new picture of the universe and your place in it start to develop along very pleasing lines.

Jupiter in the Third House

Your thirst for knowledge and experience can get you in trouble because you lack concentration. Because of this, you move from item to item, always feeling the next thing will do it. You lack closure. Becoming complete means being less impatient with the here and now and feeling satisfied with what you already know.

D. THE GROWTH ASPECTS

The Growth aspects operate differently than other aspects in your chart. While it is possible to use them descriptively, as showing finer shades of meaning within the chart, we wish to use them in a different manner for our purposes. The growth aspects are tools of self development. If you apply attention to the various qualities in your nature linked through the growth aspects, you will see positive change over time. These qualities generally do not show quick effortless solutions, but instead show a path of change requiring exertion and emotional honesty. Under these circumstances, the way these aspects of your nature change through time are truly amazing. The qualities mentioned here can be the very mechanisms to release the highest, finest side of your nature.

Mercury in Growth Aspect to Jupiter

Learning to express the truth of any situation without exaggeration or self hyperbole is a long lesson. Consistent refocusing on the higher implications of life, the moral and ethical significance of actions, has a refining effect on your mind.

Mercury Quincunx Jupiter

Exaggeration is second nature to you. Whatever you focus on tends to grow in your mind without anything happening in the external world. Circumstances in life can easily seem much better or much worse than they really are. Learn to trust other people's assessment and to judge life more on the concrete facts and less on moral pronouncements which tend to be very colored by self justification and avoidance.

Venus in Growth Aspect to Saturn

You limit your own arena of emotional expression. Getting over your fears and learning how to correctly value your self and others is the path to positive, responsible expression of your feelings. The path of self knowledge requires some fine tuning of your way of exploring relationships. Overcoming fear of others and your inherent shyness only happens with practice. The rewards are that you learn about yourself while getting closer to others.

Venus Semi-Sextile Saturn

Learning to "reach out" more meaningfully to others requires you to realize how you, in fact, hold yourself back through your self criticism and negative expectation as to what others want from you.

Mars in Growth Aspect to Neptune

Just when you seem to have your aims and goals determined it's as if they evaporate or expand to some much larger context. Your ideals always seem to be out of reach of your energy. To compensate you may live in an alternate reality, escaping into fantasy where you control or create the rules or you become slightly cynical, feeling victimized by

circumstances. The way out is through slow, careful integration of your values and higher ideals bit by bit. This requires patience and much trial and error reality testing.

Mars Semi-Sextile Neptune

Certain things that you aim for in life seem to be unavailable for you at the last minute. You may work long and hard on a project only to stumble coming down the finish line. Real growth starts occurring for you when you are able to see that something inside you gets in your way. Further, some aspect of your higher idealism intervenes in an attempt to raise the level of manifestation of your energy; and, when you see and acknowledge this aspect of your nature you are able to nurture the positive, idealistic, and dramatic qualities in your artistic expression. There is a subtle magnetic quality in your being that can be quite persuasive and helpful to others under careful guidance.

Saturn in Growth aspect to Pluto

There is an austere streak in your nature that you can use for your development. In order for this quality to be useful to you though, you need to be able to translate the propensities to be frugal, diminutive, and limiting into something that is a productive tool. When this efficiency driven part of your personality is focused on tactical or technical considerations, this tight knit bundling of energy serves you well. Still, for you, “small” should never be an end in itself. In this process of growth you may have to come to terms with the part of your nature that is fearful and the part of you that is fanatical. It may not be obvious to you at first, but this very attribute will force you to develop a deeper grasp of your own psychology as several years of observation go by.

Saturn Semi-Sextile Pluto

Learning how to develop meaningful discipline will lead you to more positive career achievement. Even though your natural inclination is to find some idea or procedure that works, you often lack vision as to how to expand and share your techniques and procedures with others. Reevaluate your situation. Sometimes when you ask too much of yourself, instead of being in the mood of healthy self structuring, you are just being selfish. Look at this closely, then reexamine your fears in relationship to your goals. No discipline, no progress. And, it is also true, if you “play your cards too close to your chest”, even you can’t see them.

E. THE DECLINATIONS

There is another dimension to your astrology chart. This has to do with planets being the same distance from the celestial equator. When both planets are on the same side of this plane there are called parallel. When the planets are the same distance but on opposite sides of the celestial equator they are referred to as being contra-parallel. Both of these aspect activate your ability to organize and reorganize some aspect of your life.

Mercury Parallel Neptune

Your idealistic mind is colored by a storehouse of subjective impressions and judgements. This can give great depth to your understanding, and certainly heightens your understanding of seemingly impenetrable problems and difficulties.

Uranus Parallel Pluto

Your basic conflicting urges from deep within your being will rush forward every so often, causing you to make dramatic changes in your life. As you get used to letting the need for uniqueness come forward and express itself, this aspect of your nature stops being so explosive and just becomes part of the inventiveness that makes you so fascinating.

Moon Contra-Parallel Mars

There is a rash and impetuous side to the way your emotions operate. It’s as if something deep down in you is always “stirring the pot”. This can create movement, passion, intrigue, criticism or just stress.

Saturn Contra-Parallel Neptune

There is a dreamy aspect to your nature that can noticeably impede your focus. Learning to use this aspect of your personality in a positive way will mean learning good sequencing. Establish your priorities. Then, the rest of your life unfolds systematically. Just remember, you can't do everything at once.

F. YOUR KARMIC DIRECTION

The Moon's North Node is an all encompassing and instructive point of synthesis in the chart; we could easily start or end our analysis with this one single factor. Because this indicator is so all inclusive it most shows your karmic direction in life. The sign placement of your North node points to your destiny. When your actions, interests, and values are structured by this position, your general sense of personal well being improves. The house placement of the North Node of the Moon indicates or points to an area of life, an arena of experience. By confronting, even augmenting this arena you can inadvertently improve every aspect of your life. By dealing with issues connected to the North Node placement in your chart your general character strengthens and refines.

North Node of the Moon in Pisces

Growth comes by expanding your faith in positive spiritual principles of living. Your natural inclination is to analyze and label everything; matter of fact, you over-analyze. You need to grow beyond this trait through developing trust in the inherent goodness of the way things happen. Human relationships improve through believing in people and seeing their positive attributes. As you augment the ideal factors in your dealings with others you become more emotionally satisfied with your own life.

North Node of the Moon in Pisces and in the Fourth House

You grow in consciousness by addressing your emotions and family. You're easily imprisoned in past patterns of rigid compliance with your self-created rules and the administering of self-assumed responsibilities. Learning about the emotions expands your vision and raises your faith in life. This, in turn, raises your consciousness.
